Recessed Wheels

Warranty Information: The manufacturer offers a three year warranty. The foam packs (on the inside) have a one year warranty. Foam can be replaced if needed. With normal wear the foam pack should last approximately ten years. The case is water resistant (not waterproof). The tongue-in-groove seat on the cases will prevent moisture from entering for a short time (ex. moving from the car to the building), but cannot be depended upon to protect bells if left outside for extended periods of time. 12/07
